

FAR INFRARED SAUNAS

Infrared Saunas are fast becoming very popular for a variety of reasons including: the additional health benefits, lower cost of operation and maintenance, ease of set up and installation.

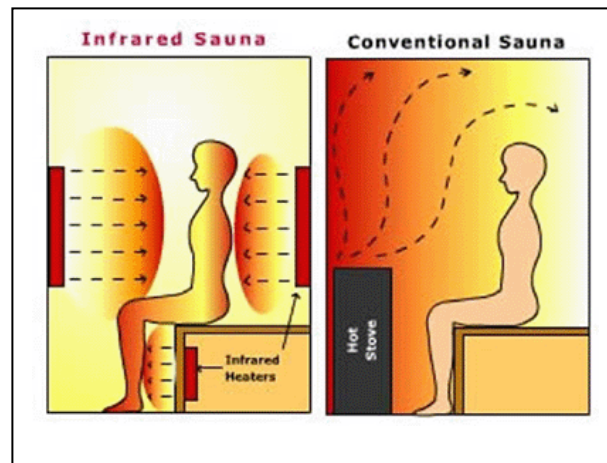

PPL Fitness provides a range of infrared radiant heat saunas to accommodate a variety of budgets, space requirement and size. Infrared Saunas come in easy to assemble kits, pre-fabricated units or custom designed units that are built in place.

Infrared Heat Health Benefits

- Reduce Inflammation
- Decrease stress and fatigue
- Burn up to 600 calories per-session
- Remove toxins from body
- Relief from muscle and joint pains
- Ease joint stiffness
- Boost immune system functions
- Increase overall blood flow
- Improve metabolism by increasing fluid circulation
- Improve skin texture

Why Use Infrared Heat?

- Softer radiant heat source (40% lower air temperature than traditional)
- Quicker warm up time
- Improved detoxification over traditional saunas
- Stronger and deeper tissue penetration
- Safe for all ages
- Low energy usage
- Gentle on skin
- Decreased moisture build-up
- Near ZERO maintenance

Far Infrared Sauna Features

Constant Concentrated Infrared

Because Far- Infrared Rays travel in a straight line, conventional Infrared heating elements cannot reach every part of your body. Infra-Core's patented Far-Infrared Heaters are coiled in a concave shape to allow for a much more concentrated range. In addition we use additional emitters to ensure a broader range of Far-Infrared dispersion throughout the sauna. So no matter how you are positioned in a Infra-Core Sauna, whether you are directly in front of a heater or not, your **WHOLE BODY** is effectively receiving the beneficial Far-Infrared Rays.

Pure Ceramic Heaters

Infra-Core Sauna's patented pure ceramic Far-Infrared heaters are more effective at lower temperatures and **LOWER WATTAGES** because ceramic requires much less energy to heat than steel. Also our Rapid Air System enhances Far-Infrared penetration and detoxification process by cooling emitters for an even greater concentration of Far-Infrared. (Patent Pending).

SS Grills

#304 Surgical Stainless Steel grills (felt coated grills may release gases).

Infra-Core Control

Commander Control panel with a safety shut-off timer is standard on all models. After the preset cycle is complete, the heaters turn off automatically.

Cedar Backrest

For additional protection, Infra-Core adds a protective grid which doubles as a backrest to shield your skin from the heater grills.

Infra-Core Technology

Using cutting edge technology. Infra-Core Heaters produce Far-Infrared light like the sun's, but without harmful Ultraviolet Rays (UV) or Electromagnetic Field (EMF) radiation. Infra-Core Heaters emit a very safe Gauss reading.

Rapid Air System

Enhances Far Infrared penetration and detoxification process. (Patent Pending).

Euro-Light Canopy

Euro-light exterior canopy with low voltage lighting.

Medical Research & Benefits

Far Infrared saunas which use pure ceramic concave shape emitters are backed by a long history, extensive medical research and results....Does the new technology?

SUNSET - 4x4

Dimension:122x116x194cm

Capacity:2person

Power:

Ceramic Rods 1600W 120volts (or) Carbon Fiber 1600W 120 volts

Packing size:

big box(with inner board protection):180x126x33cm

small box:127x128x28.5cm

G.W:170kgs

- Hemlock Wood with Ceramic Heaters
- Cedar Wood with Carbon Fiber Heaters
- (Cedar Wood saunas with windows are full length)

SUNSET -4x5

Dimension:155x110x194cm

Capacity: 3person

Power:

Ceramic Rods 1600W 120volts (or) Carbon Fiber 1600W 120 volts

Packing size:

big box(with inner board protection):180x161x33cm

small box(with inner board protection):165x133x33cm

G.W:230kgs

- Hemlock Wood with Ceramic Heaters
- Cedar Wood with Carbon Fiber Heaters
- (Cedar Wood saunas with windows are full length)
