

STEAM BATH GENERATORS

PPL provide a variety of steam bath generator options, as well as full design and construction parameters that will ensure your steam room performs that way it is meant to.

Without proper ceiling slops, insulation, vapour barriers etc., a steam room can prove to be very costly. PPL will work with you on the design and ensure the proper steam generator is used based on the size and usage of the room.

We are committed to performance without sacrificing any safety concerns.

Saunacore steam bath generators are approved to meet CSA, UL and CE standards. The steamer boiler tank and water level control have a lifetime warranty.

Steamcore steam baths operate safely and are durable and reliable for many years. Furthermore, these innovative units are compact and easy to install.

Steamcore has designed steam bath generators that range from 2 kilowatts/120 Volts up to 36 kilowatts/600 Volts. These steam bath generators can easily be put into small areas such as a closet or under a
